

- 1 The diagram shows the production possibility curve (PPC) of an economy that produces goods and services.

What might cause the shift of the PPC from  $XY_1$  to  $XY_2$ ?

- A a decrease in the demand for services
  - B a decrease in the efficiency in the production of services
  - C a decrease in the opportunity cost of producing services
  - D a decrease in the resources employed in services
- 2 An economy has changed from a command economy to a market economy.
- What might increase after this change?
- A the amount of centralised decision making
  - B the extent of externalities
  - C the level of government economic intervention
  - D the production of merit goods
- 3 What is most likely to be a result from the division of labour?
- A a decrease in job satisfaction
  - B a decrease in productivity
  - C an increase in the cost of living
  - D an increase in unit labour costs
