

- 16 A team of nine dogs can pull a sledge with a combined force of 800 N at a speed of  $1.5 \text{ m s}^{-1}$  for 360 minutes.

What is the average work done by each dog during this time?

- A  $4.8 \times 10^4 \text{ J}$       B  $4.3 \times 10^5 \text{ J}$       C  $2.9 \times 10^6 \text{ J}$       D  $2.6 \times 10^7 \text{ J}$

- 17 Which statement is correct?

- A A ball lands on the ground and bounces. The kinetic energy changes sign, because the ball changes direction.
- B A car drives up a slope at a steady speed. The power generated by the engine equals the potential energy gained per unit time.
- C An electric heater can be 100% efficient.
- D It is impossible for momentum to be conserved in a collision.

- 18 The diagram shows a pump called a hydraulic ram.

In one such pump the long approach pipe holds 500 kg of water. A valve shuts when the speed of this water reaches  $2.0 \text{ m s}^{-1}$  and the kinetic energy of this water is used to lift a small quantity of water by a height of 15 m.

The efficiency of the pump is 10%.

Which mass of water could be lifted 15 m?

- A 0.15 kg      B 0.68 kg      C 1.5 kg      D 6.8 kg

- 19 A conveyor belt is driven at velocity  $v$  by a motor. Sand drops vertically on to the belt at a rate of  $m \text{ kg s}^{-1}$ .

What is the additional power needed to keep the conveyor belt moving at a steady speed when the sand starts to fall on it?

- A  $\frac{1}{2} mv$       B  $mv$       C  $\frac{1}{2} mv^2$       D  $mv^2$
