

- 19 The diagram represents the production possibility curves of two economies X and Y.

As a result of soil erosion in economy X, the production possibility curve shifts from X to X₁.

According to the law of comparative advantage, what should country Y do following this change?

- A cease to trade with country X
 - B export agricultural goods to country X
 - C export manufactured goods to country X
 - D import both agricultural and manufactured goods from country X
- 20 Which of the following will increase a country's protection against imports?
- A an appreciation of its exchange rate
 - B an increase in its inflation rate
 - C a reduction in the size of existing import quotas
 - D a reduction in subsidies to domestic producers
- 21 When will there be a favourable movement in a country's terms of trade?
- A when the prices of its exports fall by more than the prices of its imports
 - B when the prices of its imports rise by less than the prices of its exports
 - C when the volume of its exports increases by more than the volume of its imports
 - D when the volume of its imports increases by more than the volume of its exports
