

- 18** The market price of an agricultural commodity was so low that the government fixed a minimum price for it above the market equilibrium price. However, the government did not buy any of the commodity itself.

What would happen as a result?

- A** There would be an equilibrium in the market but the change in farmers' incomes would be uncertain.
  - B** There would be a shortage on the market and farmers' incomes would rise.
  - C** There would be a surplus on the market and farmers' incomes would fall.
  - D** There would be a surplus on the market but the change in farmers' incomes would be uncertain.
- 19** In the diagram, MN is the production possibility curve of a country that has a comparative advantage in the production of good Y.

What might enable the country to consume the quantities of X and Y indicated by point R?

- A** increased specialisation in the production of good X
- B** international trade
- C** a reduction in unemployment
- D** increased specialisation in the production of good Y
