

- 24** Two springs P and Q both obey Hooke's law. They have spring constants $2k$ and k respectively.

The springs are stretched, separately, by a force that is gradually increased from zero up to a certain maximum value, the same for each spring. The work done in stretching spring P is W_P , and the work done in stretching spring Q is W_Q .

How is W_P related to W_Q ?

- A** $W_P = \frac{1}{4}W_Q$ **B** $W_P = \frac{1}{2}W_Q$ **C** $W_P = 2W_Q$ **D** $W_P = 4W_Q$

- 25** Which value is a possible wavelength for radiation in the microwave region of the electromagnetic spectrum?

- A** $3 \times 10^{-2} \text{ m}$ **B** $3 \times 10^{-5} \text{ m}$ **C** $3 \times 10^{-8} \text{ m}$ **D** $3 \times 10^{-10} \text{ m}$

- 26** The four graphs represent a progressive wave on a stretched string. Graphs **A** and **B** show how the displacement d varies with distance x along the string at one instant. Graphs **C** and **D** show how the displacement d varies with time t at a particular value of x .

The labels on the graphs are intended to show the wavelength λ , the period T , and the amplitude a of the wave, but only one graph is correctly labelled.

Which graph is correctly labelled?
