

10 A mass accelerates uniformly when the resultant force acting on it

- A is zero.
- B is constant but not zero.
- C increases uniformly with respect to time.
- D is proportional to the displacement from a fixed point.

11 A molecule of mass  $m$  travelling horizontally with velocity  $u$  hits a vertical wall at right angles to the wall. It then rebounds horizontally with the same speed.

What is its change in momentum?

- A zero      B  $mu$       C  $-mu$       D  $-2mu$

12 Two balls X and Y approach each other along the same straight line and collide elastically.

Their speeds are  $u_X$  and  $u_Y$  respectively. After the collision they move apart with speeds  $v_X$  and  $v_Y$  respectively. Their directions are shown on the diagram.

Which of the following equations is correct?

- A  $u_X + u_Y = v_X + v_Y$
- B  $u_X + u_Y = v_X - v_Y$
- C  $u_X - u_Y = v_X + v_Y$
- D  $u_X - u_Y = v_X - v_Y$
