

- 22** The variation with distance  $x$  of the displacement  $y$  of a transverse wave on a rope is shown at time  $t = 0$ .

The wave has a frequency of  $0.5 \text{ Hz}$ .

A point  $X$  on the rope is marked. The diagram shows the original position of  $X$  and four new positions.

What is the position of  $X$  at time  $t = 1 \text{ s}$ ?

- 23** A sound wave is detected by a microphone. The output from the microphone is connected to the Y-input of a cathode-ray oscilloscope (c.r.o.). The trace on the c.r.o. is shown.

The time-base is set at  $0.20 \text{ ms}$  per division.

What is the frequency of the sound wave?

- A**  $1000 \text{ Hz}$       **B**  $1250 \text{ Hz}$       **C**  $2000 \text{ Hz}$       **D**  $2500 \text{ Hz}$
- 24** A bat flies directly towards a fixed ultrasound detector at a speed of  $25.0 \text{ m s}^{-1}$  emitting pulses of ultrasound of frequency  $40.0 \text{ kHz}$ .

The speed of sound in air is  $330 \text{ m s}^{-1}$ .

Which frequency does the ultrasound detector record?

- A**  $37.0 \text{ kHz}$       **B**  $37.2 \text{ kHz}$       **C**  $43.0 \text{ kHz}$       **D**  $43.3 \text{ kHz}$
