

7 Travellers can cross the English Channel either by the Channel Tunnel or by a sea journey.

The table gives details of the passengers, in thousands, using these services between 2005 and 2015.

Between 2005 and 2015 the price of the Channel Tunnel fell and the price of sea journeys rose.

year	Channel Tunnel passengers	sea journey passengers
2005	17 005	23 693
2010	18 303	21 883
2015	20 864	21 000

What does the data suggest?

- A The cross elasticity of demand between the two services is positive.
 - B The market for crossing the English Channel grew continuously over the period.
 - C The rate of decline in sea journeys accelerated over the period.
 - D The two services for crossing the English Channel are complementary.
- 8 The diagrams represent the demand curves for three goods X, Y and Z. They are drawn to the same scale and can be used to represent the price elasticity of each good. The three goods are lamb only, all meat and all food.

Which combination of goods is likely to represent lamb only, all meat and all food?

	good X	good Y	good Z
A	food	meat	lamb
B	lamb	meat	food
C	lamb	food	meat
D	meat	lamb	food
