

- 29 Electrons are accelerated and then directed into the uniform electric field between two parallel plates in a vacuum.

What best describes the shape of the path followed by the electrons in the field?

- A a downwards curve along a line that is part of a circle
 - B a downwards curve along a line that is **not** part of a circle
 - C an upwards curve along a line that is part of a circle
 - D an upwards curve along a line that is **not** part of a circle
- 30 A charged particle is in the electric field between two horizontal metal plates connected to a source of constant potential difference, as shown. There is a force F on the particle due to the electric field.

The separation of the plates is doubled.

What will be the new force on the particle?

- A $\frac{F}{4}$ B $\frac{F}{2}$ C F D $2F$
