

- 1 Twelve tourists were asked to estimate the height, in metres, of a new building. Their estimates were as follows.

50    45    62    30    40    55    110    38    52    60    55    40

- (i) Find the median and the interquartile range for the data. [3]

[illegible]

- (ii) Give a disadvantage of using the mean as a measure of the central tendency in this case. [1]

[illegible]
