

- 14 A bicycle pedal is connected to a pivot by a metal bar, as shown.

The force on the pedal is 60 N downwards.

What is the moment of this force about the pivot?

- A 7.2 Nm B 9.6 Nm C 12 Nm D 1200 Nm
- 15 For a change in depth Δh in a liquid of density ρ , the change in pressure Δp is given by $\Delta p = \Delta h \rho g$ where g is the acceleration of free fall.

What is the equation, or principle of physics, used in the derivation of this formula?

- A atmospheric pressure decreases with height
- B change in gravitational potential energy = mass $\times g \Delta h$
- C $\rho = \frac{\text{mass}}{\text{volume}}$
- D the density of a fluid increases with depth
