

- 14** One end of a U-shaped tube is attached to a gas tap, with its other end open to the atmosphere. It contains water of density  $1000 \text{ kg m}^{-3}$  and the heights of both sides of the water column are shown.

The atmospheric pressure is 101 kPa.

What is the pressure of the gas from the gas tap?

- A** 99 kPa      **B** 100 kPa      **C** 102 kPa      **D** 103 kPa
- 15** A trolley runs from P to Q along a track. At Q its potential energy is 50 kJ less than at P.

At P, the kinetic energy of the trolley is 5 kJ. Between P and Q, the trolley does 10 kJ of work against friction.

What is the kinetic energy of the trolley at Q?

- A** 35 kJ      **B** 45 kJ      **C** 55 kJ      **D** 65 kJ
