

- 17 A car driver adjusts the pressure on a car's brakes so that the car travels at constant speed down a hill from P to Q.

The magnitude of the change in the car's kinetic energy is ΔE_k . The magnitude of the change in its gravitational potential energy is ΔE_p .

Which statement is correct?

- A** $\Delta E_k > \Delta E_p$ **B** $\Delta E_k = \Delta E_p$ **C** $\Delta E_p > \Delta E_k > 0$ **D** $\Delta E_k = 0$
- 18 An area of land is an average of 2.0 m below sea level. To prevent flooding, pumps are used to lift rainwater up to sea level.

What is the minimum pump output power required to deal with 1.3×10^9 kg of rain per day?

- A** 15 kW **B** 30 kW **C** 150 kW **D** 300 kW
- 19 A twig from a tree drops from a 200 m high cliff on to a beach below. During its fall, 40% of the twig's energy is converted into thermal energy.

What is the speed with which the twig hits the beach?

- A** 35 m s^{-1} **B** 40 m s^{-1} **C** 49 m s^{-1} **D** 63 m s^{-1}
- 20 Pollen grains are suspended in a liquid and are illuminated strongly. When observed under a microscope they are seen to be in continuous random motion.

What is the reason for this?

- A** convection currents in the liquid
B evaporation of the liquid
C molecules of the liquid colliding with the pollen grains
D pollen grains colliding with each other
