

- 18 Liquids X and Y are stored in large open tanks. Liquids X and Y have densities of  $800 \text{ kg m}^{-3}$  and  $1200 \text{ kg m}^{-3}$  respectively.

At what depths are the pressures equal?

	depth in liquid X	depth in liquid Y
<b>A</b>	8 m	12 m
<b>B</b>	10 m	10 m
<b>C</b>	15 m	10 m
<b>D</b>	18 m	8 m

- 19 When white sugar granules are heated, they melt. When the melt is cooled quickly, a brittle solid form of toffee is produced.

How does the structure of the sugar change?

- A** amorphous to polymeric  
**B** crystalline to amorphous  
**C** crystalline to polymeric  
**D** polymeric to amorphous
- 20 A ductile material is stretched by a tensile force to a point beyond its elastic limit. The tensile force is then reduced to zero. The graph of force against extension is shown below.

Which area represents the net work done on the sample?

- A** X                      **B** X + Y                      **C** Y + Z                      **D** Z
