

15 Which force is caused only by a pressure difference?

- A friction
- B upthrust
- C viscous force
- D weight

16 The total energy input E_{in} in a process is partly transferred to useful energy output U and partly transferred to energy that is wasted W .

What is the efficiency of the process?

- A $\frac{U}{E_{\text{in}}} \times 100\%$
- B $\frac{W}{E_{\text{in}}} \times 100\%$
- C $\frac{U}{W} \times 100\%$
- D $\frac{U+W}{E_{\text{in}}} \times 100\%$

17 A gas is enclosed inside a cylinder which is fitted with a frictionless piston.

Initially, the gas has a volume V_1 and is in equilibrium with the external pressure p . The gas is then heated slowly so that it expands at constant pressure, pushing the piston back until the volume of the gas has increased to V_2 .

How much work is done by the gas during this expansion?

- A $p(V_2 - V_1)$
- B $\frac{1}{2}p(V_2 - V_1)$
- C $p(V_2 + V_1)$
- D $\frac{1}{2}p(V_2 + V_1)$
