

- 27 A diffraction grating with N lines per metre is used to deflect light of various wavelengths λ .

The graph shows a relation between the deflection angle θ and λ for different wavelengths in the n^{th} order interference pattern.

What is the gradient of the graph?

- A Nn B $\frac{N}{n}$ C $\frac{n}{N}$ D $\frac{1}{Nn}$
- 28 Which wave phenomenon is **not** needed to explain the pattern of observable fringes produced by a double slit experiment?
- A coherence
B diffraction
C interference
D reflection
- 29 Which diagram shows the electric field pattern of an isolated negative point charge?
