

- 8 A stone is thrown upwards from the top of a cliff. After reaching its maximum height, it falls past the cliff-top and into the sea.

The graph shows how the vertical velocity v of the stone varies with time t after being thrown upwards. R and S are the magnitudes of the areas of the two triangles.

What is the height of the cliff-top above the sea?

- A** R **B** S **C** $R + S$ **D** $R - S$
- 9 Two similar spheres, each of mass m and travelling with speed v , are moving towards each other.

The spheres have a head-on elastic collision.

Which statement is correct?

- A** The spheres stick together on impact.
B The total kinetic energy after impact is mv^2 .
C The total kinetic energy before impact is zero.
D The total momentum before impact is $2mv$.
