

- 18** Brazil and Colombia attempt to control the supply of coffee in the world market to help stabilise their incomes.

What condition is essential for this to stabilise their incomes effectively?

- A** There must be large firms in the industry.
- B** It must be possible to store the coffee and release stocks when necessary.
- C** Other countries must supply a significant percentage of the total market.
- D** The demand for the product must be elastic.

- 19** Country X has a comparative advantage in producing wheat and country Y in producing cars. However, the countries choose not to specialise and trade.

What is a valid reason for this behaviour?

- A** The exchange rate lies within the countries' opportunity cost ratios.
- B** There is immobility of factors of production between the countries.
- C** Trade is based on absolute rather than comparative advantage.
- D** Transport costs are high relative to the opportunity cost differences between the countries.

- 20** What would be an economic benefit to a country of imposing a tariff on imported goods?

- A** It would increase global productivity.
- B** It would make the country's exports more competitive.
- C** It would put pressure on foreign suppliers to reduce their prices.
- D** It would reduce the prices paid by consumers for imported goods.

- 21** When must the terms of trade of a country change?

- A** when the volume of exports falls and the volume of imports rises
- B** when the total value of exports falls and the total value of imports rises
- C** when the balance of trade moves from deficit to surplus
- D** when the average price of exports rises and the average price of imports falls
