

- 25 The diagram shows a steel wire clamped at one end and tensioned at the other by a weight hung over a pulley.

A vibration generator is attached to the wire near the clamped end. A stationary wave with one loop is produced. The frequency of the vibration generator is f .

Which frequency should be used to produce a stationary wave with two loops?

- A $\frac{f}{4}$ B $\frac{f}{2}$ C $2f$ D $4f$

- 26 Which row describes the circumstances under which forces act on a charged particle in a uniform electric field?

	charged particle	direction of force
A	moving charges only	parallel to the field
B	stationary charges only	perpendicular to the field
C	stationary and moving charges	parallel to the field
D	stationary and moving charges	perpendicular to the field
