

- 11 A helium atom of mass  $m$  collides normally with a wall. The atom arrives at the wall with speed  $v$  and then rebounds along its original path. Assume that the collision is perfectly elastic.

What is the change in the momentum of the atom during its collision?

- A zero                      B  $0.5mv$                       C  $mv$                       D  $2mv$

- 12 A cylindrical iceberg of height  $H$  floats in sea water. The top of the iceberg is at height  $h$  above the surface of the water.

The density of ice is  $\rho_i$  and the density of sea water is  $\rho_w$ .

What is the height  $h$  of the iceberg above the sea water?

- A  $\left(1 - \frac{\rho_i}{\rho_w}\right)H$       B  $\left(\frac{\rho_i}{\rho_w} - 1\right)H$       C  $\frac{\rho_w}{\rho_i}H$                       D  $\frac{\rho_i}{\rho_w}H$

- 13 A couple is applied to a tap as shown.

What is the torque of the couple?

- A  $\frac{Fd}{2}$                       B  $Fd$                       C  $2Fd$                       D  $4Fd$
