

In the diagram,  $OAB$  is a sector of a circle with centre  $O$  and radius  $r$ . The point  $C$  on  $OB$  is such that angle  $ACO$  is a right angle. Angle  $AOB$  is  $\alpha$  radians and is such that  $AC$  divides the sector into two regions of equal area.

- (i) Show that  $\sin \alpha \cos \alpha = \frac{1}{2}\alpha$ . [4]

It is given that the solution of the equation in part (i) is  $\alpha = 0.9477$ , correct to 4 decimal places.

- (ii) Find the ratio

perimeter of region  $OAC$  : perimeter of region  $ACB$ ,

giving your answer in the form  $k : 1$ , where  $k$  is given correct to 1 decimal place. [5]

- (iii) Find angle  $AOB$  in degrees. [1]
