

- 8 A golf ball of mass m is dropped onto a hard surface from a height h_1 and rebounds to a height h_2 .

The momentum of the golf ball just as it reaches the surface is different from its momentum just as it leaves the surface.

What is the total change in the momentum of the golf ball between these two instants? (Ignore air resistance.)

- A $m\sqrt{2gh_1} - m\sqrt{2gh_2}$
- B $m\sqrt{2gh_1} + m\sqrt{2gh_2}$
- C $m\sqrt{2g(h_1 - h_2)}$
- D $m\sqrt{2g(h_1 + h_2)}$
- 9 A book of weight W is at rest on a table. A student attempts to state Newton's third law of motion by saying that 'action equals reaction'.

If the weight of the book is the 'action' force, what is the 'reaction' force?

- A the force W acting downwards on the Earth from the table
- B the force W acting upwards on the book from the table
- C the force W acting upwards on the Earth from the book
- D the force W acting upwards on the table from the floor
