

- 29 Which row describes the circumstances under which forces act on a charged particle in a uniform electric field?

	charged particle	direction of force
<b>A</b>	moving charges only	parallel to the field
<b>B</b>	stationary charges only	perpendicular to the field
<b>C</b>	stationary and moving charges	parallel to the field
<b>D</b>	stationary and moving charges	perpendicular to the field

- 30 The resistance of a thermistor depends on its temperature, and the resistance of a light-dependent resistor (LDR) depends on the illumination.

Under which conditions will the resistance of both a thermistor and an LDR be highest?

	thermistor	LDR
<b>A</b>	highest temperature	highest illumination
<b>B</b>	highest temperature	lowest illumination
<b>C</b>	lowest temperature	highest illumination
<b>D</b>	lowest temperature	lowest illumination

- 31 In terms of energy transfer  $W$  and charge  $q$ , what are the definitions of potential difference (p.d.) and electromotive force (e.m.f.)?

	p.d.	e.m.f.
<b>A</b>	$\frac{W}{q}$	$\frac{W}{q}$
<b>B</b>	$\frac{W}{q}$	$Wq$
<b>C</b>	$Wq$	$\frac{W}{q}$
<b>D</b>	$Wq$	$Wq$
