

- 6 The graph relates to the motion of a falling body.

Which is a correct description of the graph?

- A  $y$  is distance and air resistance is negligible
  - B  $y$  is distance and air resistance is not negligible
  - C  $y$  is speed and air resistance is negligible
  - D  $y$  is speed and air resistance is not negligible
- 7 Which graph represents the motion of a car that is travelling along a straight road with a uniformly increasing speed?
