

- 9 The diagram shows the supply curve of coffee in an economy.

The market equilibrium is initially at point X, but a change moves it to point Y.

What might explain this?

- A an increase in wages paid by producers of coffee
 - B a switch in consumer tastes from coffee to tea
 - C an increase in the price of tea
 - D a tax imposed on coffee producers
- 10 In the diagram OS_1 and OS_2 are two straight-line supply curves.

As price increases, the elasticity of supply

- A decreases along both OS_1 and OS_2 .
- B increases less rapidly along OS_1 than along OS_2 .
- C increases more rapidly along OS_1 than along OS_2 .
- D is constant along OS_1 and along OS_2 .
