

- 16 Some gas in a cylinder is supplied with thermal energy q .

The gas does useful work in expanding at constant pressure p from volume V_0 to volume V_F , as shown.

Which expression gives the efficiency of this change?

- A $\frac{pV_0}{q}$ B $\frac{V_F}{V_0q}$ C $\frac{p(V_F - V_0)}{q}$ D $\frac{(V_F - V_0)}{V_0q}$

- 17 The power P required to move an object through a medium at constant speed depends on the speed v and the resistive force F acting on the object.

The resistive force F also depends on the speed v .

Which row shows a possible relationship between speed v , resistive force F and power P ?

	resistive force F	power P
A	proportional to v	constant
B	proportional to v	proportional to v
C	proportional to v^2	proportional to v^2
D	proportional to v^2	proportional to v^3

- 18 Which amount of energy is **not** 2400 J?

- A the decrease in gravitational potential energy of a body of mass 60 kg when it moves vertically downwards through 40 m near the Earth's surface
- B the energy transferred in 15 s by a machine of power 160 W
- C the kinetic energy of a body of mass 12 kg moving at a speed of 20 m s^{-1}
- D the work done by a gas expanding against a constant external pressure of 120 kPa when its volume increases by 0.020 m^3
