

**22** What is an export of services in Jamaica's current account?

- A** an inflow of funds to Jamaica to buy shares
- B** earnings from US tourists visiting Jamaica
- C** earnings of Haitian workers in Jamaica sent to Haiti
- D** the export of Jamaican coffee

**23** The table shows the number of workers and the annual output of an industry.

	year 1	year 2	year 3
Workers in 000s	120	130	100
Output in \$m	12.00	14.30	13.00

Which statement is correct?

- A** Labour productivity increases in year 2 and in year 3.
- B** Labour productivity increases in year 2 and then declines in year 3.
- C** Labour productivity is at its highest in year 1.
- D** Labour productivity is at its lowest in year 3.

**24** The table shows the weights used over three years in the UK consumer price index.

	2001	2002	2003
food	116	114	109
motoring expenditure	140	141	146
housing	205	199	203
leisure goods	49	48	48

What can be deduced from the table?

- A** Housing was a bigger proportion of the average UK household's spending in 2003 than in 2002.
- B** The average UK household ate less in 2003 than in 2001.
- C** The average UK household spent more on motoring in 2003 than in 2001.
- D** The price of leisure goods remained unchanged between 2002 and 2003.
