

- 29 A microwave transmitter is placed at a fixed distance from a flat reflecting surface, as shown.

A microwave detector is moved steadily in a straight line from X to Y. A series of maxima and minima of intensity is obtained. The distance between adjacent maxima is 1.5 cm.

What is the frequency of the microwave radiation?

- A $1.0 \times 10^8 \text{ Hz}$
B $2.0 \times 10^8 \text{ Hz}$
C $1.0 \times 10^{10} \text{ Hz}$
D $2.0 \times 10^{10} \text{ Hz}$
- 30 Two parallel circular metal plates X and Y, each of diameter 18 cm, have a separation of 9.0 cm. A potential difference of 9.0 V is applied between them.

Point P is 6.0 cm from the surface of plate X and 3.0 cm from the surface of plate Y.

What is the electric field strength at P?

- A 50 NC^{-1} B 100 NC^{-1} C 150 NC^{-1} D 300 NC^{-1}
