

- 13** A mass attached to the lower end of a spring bounces up and down.

At which points in the path of the mass do the gravitational potential energy of the mass (GPE), the elastic potential energy in the spring (EPE) and the kinetic energy of the mass (KE) have their highest values?

	GPE	EPE	KE
<b>A</b>	bottom	middle	top
<b>B</b>	bottom	top	middle
<b>C</b>	top	bottom	middle
<b>D</b>	top	bottom	top

- 14** A mass  $m$  is situated in a uniform gravitational field.

When the mass moves through a displacement  $x$ , from P to Q, it loses an amount of potential energy  $E$ .

Which row correctly specifies the magnitude and the direction of the acceleration due to gravity in this field?

	magnitude	direction
<b>A</b>	$\frac{E}{mx}$	$\rightarrow$
<b>B</b>	$\frac{E}{mx}$	$\leftarrow$
<b>C</b>	$\frac{E}{x}$	$\rightarrow$
<b>D</b>	$\frac{E}{x}$	$\leftarrow$
