

- 2 Anabel measured the lengths, in centimetres, of 200 caterpillars. Her results are illustrated in the cumulative frequency graph below.

- (i) Estimate the median and the interquartile range of the lengths. [3]

.....

.....

.....

- (ii) Estimate how many caterpillars had a length of between 2 and 3.5 cm. [1]

.....

.....

- (iii) 6% of caterpillars were of length l centimetres or more. Estimate l . [2]
