

- 14 Gas is trapped inside a cylinder by a piston of cross-sectional area A . The piston is **not** frictionless.

The gas is heated and this causes it to expand, pushing back the piston through distance r from position P to position Q. The length of the gas column is then s .

Which expression represents the amount of work done by the gas against the atmosphere during this expansion?

- A (atmospheric pressure) $\times Ar$
 - B (atmospheric pressure) $\times As$
 - C (pressure inside the gas) $\times Ar$
 - D (pressure inside the gas) $\times As$
- 15 Water from a reservoir is fed to the turbine of a hydroelectric system at a rate of 510 kg s^{-1} . The reservoir is 280 m above the level of the turbine.

The electrical output from the generator driven by the turbine is a current of 205 A at a potential difference of 5800 V.

What is the efficiency of the system?

- A 8.3% B 12% C 83% D 85%
