

9

The diagram shows part of the curve  $y = \frac{8}{x} + 2x$  and three points  $A$ ,  $B$  and  $C$  on the curve with  $x$ -coordinates 1, 2 and 5 respectively.

- (i) A point  $P$  moves along the curve in such a way that its  $x$ -coordinate increases at a constant rate of 0.04 units per second. Find the rate at which the  $y$ -coordinate of  $P$  is changing as  $P$  passes through  $A$ . [4]
- (ii) Find the volume obtained when the shaded region is rotated through  $360^\circ$  about the  $x$ -axis. [6]
