

- 20 A mass m is situated in space in a uniform gravitational field.

When the mass moves through a displacement x , from P to Q, it loses an amount of potential energy E .

Which row correctly specifies the magnitude and the direction of the acceleration due to the gravity in this field?

	magnitude	direction
A	$\frac{E}{mx}$	\rightarrow
B	$\frac{E}{mx}$	\leftarrow
C	$\frac{E}{x}$	\rightarrow
D	$\frac{E}{x}$	\leftarrow

- 21 Why does the pressure increase when a sealed container of gas is heated?

- A** The gas molecules collide more often with each other.
- B** The gas molecules expand when they are heated.
- C** The gas molecules travel faster and hit the walls of the container more often.
- D** There are more gas molecules present to collide with the walls of the container.
