11 Blocks P, Q, R and S are made from material of the same density. Block T is made from a material of twice the density of the material of the other blocks.

The cross-sectional area and height of each of the blocks are shown.

Which two blocks exert the same pressure on the ground?

- A Pand T
- **B** Q and R
- C Q and S
- **D** S and T
- **12** Two parallel forces, each of magnitude F, act on a rod of length 5d.

Which diagram shows the positions of the two forces that will produce the largest torque on the rod?
