15 A steam turbine is used to drive a generator. The input power to the turbine is $P_{\rm I}$ and the output power is P_0 . The power loss in the turbine is P_L , as shown.

What is the efficiency of the turbine?

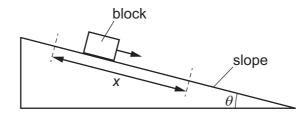

- **16** A variable force is applied to ensure that a constant power is supplied to a train.

Which graph best shows the variation of the force *F* applied with the velocity *v* of the train?

17 A block is released from rest and slides a distance *x* down a straight slope.

The slope is at an angle θ to the horizontal.

The slope is frictionless and air resistance is negligible.

The acceleration of free fall is g.

Which expression gives the final speed of the block?

- **B** $\sqrt{2gx \sin \theta}$ **C** $\sqrt{2gx}$
- $2gx \sin \theta$
