The following trace is seen on the screen of a cathode-ray oscilloscope. 5

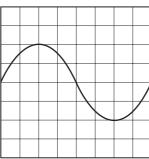

The setting of the time base is then changed from 10 ms cm⁻¹ to 20 ms cm⁻¹ and the Y-sensitivity is unaltered.

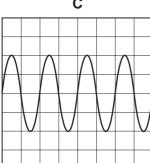

Which trace is now seen on the screen?

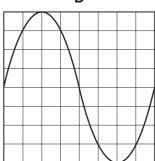

В

C

D

In a simple electrical circuit, the current in a resistor is measured as (2.50 ± 0.05) mA. The resistor is marked as having a value of $4.7 \Omega \pm 2\%$.

If these values were used to calculate the power dissipated in the resistor, what would be the percentage uncertainty in the value obtained?

- **A** 2%
- **B** 4% **C** 6%
- **D** 8%
