- **5** Four possible sources of error in a series of measurements are listed.
  - 1 an analogue meter whose scale is read from different angles
  - 2 a meter which always measures 5% too high
  - 3 a meter with a needle that is not frictionless, so the needle sometimes sticks slightly
  - 4 a meter with a zero error

Which errors are random and which are systematic?

	random error	systematic error
Α	1 and 2	3 and 4
В	1 and 3	2 and 4
С	2 and 4	1 and 3
D	3 and 4	1 and 2

**6** A football falls from the top of a tall building.

Which graph best represents the way in which the distance x fallen varies with time t?

**7** Two identical cars P and Q are travelling along a straight road. Car Q is travelling at twice the speed of car P. The brakes are applied to both cars, producing the same constant deceleration.

Which graph shows how the velocity *v* of each car varies with time *t*?
