- 4 What could reduce systematic errors?
  - A averaging a large number of measurements
  - **B** careful calibration of measuring instruments
  - c reducing the sample size
  - **D** repeating measurements
- 5 The power loss *P* in a resistor is calculated using the formula  $P = \frac{V^2}{R}$ .

The percentage uncertainty in the potential difference V is 3% and the percentage uncertainty in the resistance R is 2%.

What is the percentage uncertainty in *P*?

- **A** 4%
- **B** 7%
- **C** 8%
- **D** 11%
- 6 A lead sphere is released from rest at point X, a long way above the surface of a planet. The sphere falls in a vacuum. After a time of 4.0 s, it has fallen through a vertical distance of 3.0 m. Assume the acceleration of free fall is constant.

How far will the sphere have fallen from point X at a time of 20 s after its release?

- **A** 15 m
- **B** 75 m
- **C** 80 m
- **D** 2000 m

**7** A box rests on the Earth, as shown.

Newton's third law describes how forces of the same type act in pairs. One of the forces of a pair is the weight W of the box.

Which arrow represents the other force of this pair?
