9 An object falls 10.0 m from rest before entering some water.

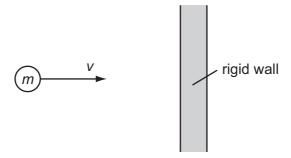

Assuming negligible air resistance, what is the time taken to reach the water and the speed with which the object reaches the water?

	time/ms	speed/ms ⁻¹
Α	1.02	10.0
В	1.02	14.0
С	1.43	10.0
D	1.43	14.0

10 A constant mass undergoes uniform acceleration.

Which of the following is a correct statement about the resultant force acting on the mass?

- A It increases uniformly with respect to time.
- **B** It is constant but not zero.
- **C** It is proportional to the displacement from a fixed point.
- **D** It is proportional to the velocity.
- **11** A particle of mass *m* strikes a vertical rigid wall perpendicularly from the left with velocity *v*.

If the collision is perfectly elastic, the total change in momentum of the particle that occurs as a result of the collision is

- A 2mv to the right.
- **B** 2mv to the left.
- **C** *mv* to the right.
- **D** mv to the left.
