23 The force *F* required to extend a sample of rubber by a distance *x* is found to vary as shown.

The energy stored in the rubber for an extension of 5 m is

- A less than 100 J.
- **B** 100 J.
- C between 100 J and 200 J.
- **D** more than 200 J.
- 24 Which of the following is a longitudinal wave?
 - A a light wave travelling through air
 - **B** a radio wave from a broadcasting station
 - C a ripple on the surface of water
 - **D** a sound wave travelling through air
- 25 A stationary sound wave is set up along the line joining two loudspeakers.

Which measurement is sufficient on its own to enable you to deduce the wavelength of the wave?

- A the amplitude of the sound wave
- **B** the distance between the two loudspeakers
- **C** the distance between two adjacent antinodes
- **D** the frequency of the sound wave
- **26** A wave of amplitude 20 mm has intensity I_X . Another wave of the same frequency but of amplitude 5 mm has intensity I_Y .

What is $\frac{I_X}{I_Y}$?

- **A** 2
- **B** 4
- **C** 16
- **D** 256
