23 A newspaper headline stated that the Australian car industry has been affected by the strength of the Australian dollar.

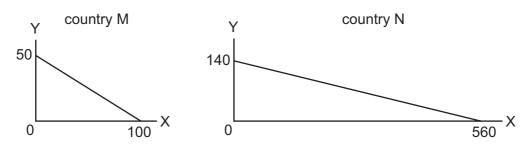

What would not be an effect caused by a strong rising Australian dollar?

- A Reduced foreign demand for Australian cars caused increased unemployment.
- **B** The price of exports of Australian cars became more expensive.
- **C** The price of foreign competitive cars became less expensive.
- **D** The price of imports of car parts became more expensive.
- **24** The terms of trade for a country have improved.

Which combination of price behaviour would have caused this?

	average price of exports	average price of imports
Α	decrease 4%	decrease 6%
В	decrease 4%	unchanged
С	increase 4%	increase 6%
D	unchanged	increase 2%

25 The graphs show the production possibilities for commodities X and Y in two countries M and N.

What will be the effect of an agreement between M and N to exchange the commodities at a rate of 1Y for 3X?

- **A** Both countries will gain, because their consumption possibilities will increase.
- **B** Consumers in country M will lose, because a unit of Y will now cost 3X instead of 2X.
- C Neither country will gain, because they both have a comparative advantage in the production of the same commodity, X.
- **D** Only country N will gain, because N can produce more of both commodities than M.
