(1)	A random sample of 10 customers is chosen. Find the probability that fewer than 8 of the logo as good.
ii)	On another occasion, a random sample of n customers of the company is chosen. Fi smallest value of n for which the probability that at least one person rates the logo as g greater than 0.995.
ii)	
ii)	smallest value of n for which the probability that at least one person rates the logo as g
ii)	smallest value of n for which the probability that at least one person rates the logo as g
ii)	smallest value of n for which the probability that at least one person rates the logo as g
ii)	smallest value of n for which the probability that at least one person rates the logo as g
ii)	smallest value of n for which the probability that at least one person rates the logo as g
ii)	smallest value of n for which the probability that at least one person rates the logo as g
ii)	smallest value of n for which the probability that at least one person rates the logo as g
ii)	smallest value of n for which the probability that at least one person rates the logo as g
ii)	smallest value of n for which the probability that at least one person rates the logo as g
ii)	smallest value of n for which the probability that at least one person rates the logo as g
ii)	smallest value of n for which the probability that at least one person rates the logo as g
ii)	smallest value of n for which the probability that at least one person rates the logo as g
