28 Which row describes the circumstances under which forces act on a charged particle in a uniform electric field?

	charged particle	direction of force
Α	moving charges only	parallel to the field
В	stationary charges only	perpendicular to the field
С	stationary and moving charges	parallel to the field
D	stationary and moving charges	perpendicular to the field

**29** The diagram shows two points P and Q which lie,  $90^{\circ}$  apart, on a circle of radius r.

A positive point charge at the centre of the circle creates an electric field of magnitude *E* at both P and Q.

Which expression gives the work done in moving a unit positive charge from P to Q?

- **A** 0
- $\mathbf{B} \quad E \times r$
- **C**  $E \times \left(\frac{\pi r}{2}\right)$
- **D**  $E \times (\pi r)$

- **30** What is the unit of resistivity?
  - $\mathbf{A} \quad \Omega \, \mathbf{m}^{-2}$
- $\boldsymbol{\mathsf{B}} \quad \boldsymbol{\Omega} \, \boldsymbol{\mathsf{m}}^{-1}$
- **C** Ω
- **D** Ωm
