11 Many people used to smoke in restaurants. Restaurant owners have found that the decline in smoking caused by a tax on cigarettes has decreased their sales of meals.

How would this be shown on demand and supply diagrams for cigarettes and for meals?

	cigarettes	meals
Α	a movement along the demand curve	a shift inwards of the demand curve
В	a movement along the supply curve	a movement along the demand curve
С	a shift outwards of the demand curve	a shift outwards of the supply curve
D	a shift outwards of the supply curve	a movement along the supply curve

12 S₁ and D₁ show the original supply and demand curves for cola. Point X is the initial equilibrium.

What will be the new equilibrium position following a rise in production costs and a fall in the price of lemonade?

- 13 Producer surplus is the difference between
 - A the consumer surplus from the good and the producers' total cost in supplying the good.
 - **B** the highest price that the consumer would be willing to pay for the good and the price the producer actually sold it for.
 - **C** the lowest price that the producer would accept for the good and the price the producer actually sold it for.
 - **D** the quantity that the producers manufacture in a week and the amount sold to consumers in that week.
