24 Polarisation is associated with certain waves.

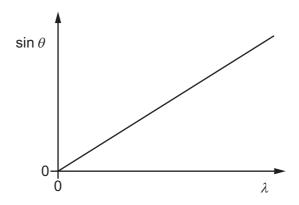

Which waves **cannot** be polarised?

- A radio waves from a transmitter
- **B** sound waves from a moving source
- C ultraviolet rays from the Sun
- **D** X-rays from an X-ray emitter
- 25 A guitar string is plucked.

Which statement describes the resulting waves?

- **A** Longitudinal waves on the string cause longitudinal waves in the air.
- **B** Longitudinal waves on the string cause transverse waves in the air.
- **C** Transverse waves on the string cause longitudinal waves in the air.
- **D** Transverse waves on the string cause transverse waves in the air.
- **26** A diffraction grating with *N* lines per metre is used to diffract light of various wavelengths λ .

The graph shows the relation between the diffraction angle θ and λ for different wavelengths in the n^{th} order interference pattern.

What is the gradient of the graph?

- A Nn
- $B = \frac{N}{n}$
- $c = \frac{r}{\Lambda}$
- $D = \frac{1}{Nn}$
- **27** A stationary sound wave is formed in the air column inside a tube that is open at both ends.

The stationary wave has three nodes.

How many antinodes does it have?

- **A** 1
- **B** 2
- **C** 3
- D 4
