15 In 2009 the Chinese government faced decreased demand in export markets and wished to increase the sales of electrical goods made in China.

Which policy would have achieved this aim?

- A increasing income tax
- **B** increasing the restrictions on the manufacture of electrical goods
- C removing a tariff on imported products
- **D** subsidising the sales of electrical goods in China's poorer rural areas
- **16** Which is a transfer payment?
 - A dividend payments to shareholders
 - **B** payments of rent
 - C unemployment benefit
 - **D** wages of government employees
- 17 In the diagram, D is the demand curve of an agricultural commodity and S is the initial supply curve.

The government promises to maintain farmers' incomes at least at their initial level. The harvests in four subsequent years are shown by supply curves $S_1 - S_4$.

In which years will the government **not** need to provide extra income to farmers?

- **A** 1 and 2
- **B** 1 and 4
- **C** 2 and 3
- **D** 3 and 4
