(b) A battery of electromotive force (e.m.f.) 14V and negligible internal resistance is connected to a resistor network, as shown in Fig. 6.1.

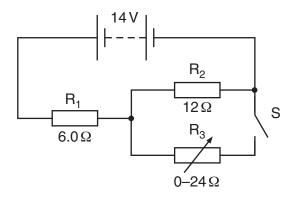

Fig. 6.1

 $\rm R_1$ and $\rm R_2$ are fixed resistors of resistances 6.0 Ω and 12 Ω respectively. $\rm R_3$ is a variable resistor.

Switch S is closed.

- (i) Calculate the current in the battery when the resistance of ${\rm R}_{\rm 3}$ is set
 - 1. at zero,

2. at 24Ω .
