15 A cost-benefit analysis concludes that a nuclear power station project might be socially worthwhile, although it will take 10 years to bring into operation.

Why might a government decide **not** to undertake the project?

- A Cost-benefit analysis has no method for valuing the long-term impact of a project.
- **B** Cost-benefit analysis is only suitable for private sector projects.
- **C** The government believes that the project has too high an opportunity cost.
- **D** The government's policy is to restrict the extent of the market system.
- **16** A good is more likely to be supplied by the government rather than a private company if it is
 - A excludable and non-rival.
 - **B** excludable and rival.
 - C non-excludable and non-rival
 - **D** non-excludable and rival
- 17 A government fixes a maximum price for a product in order to increase its consumption.

What would be the likely outcome of such a policy?

- A Consumption will fall if the maximum price is above the current equilibrium price.
- **B** Consumption will rise if the maximum price is below the current equilibrium price.
- **C** Production will fall if the maximum price is above the current equilibrium price.
- **D** Production will fall if the maximum price is below the current equilibrium price.
