10 An object, immersed in a liquid in a tank, experiences an upthrust.

What is the physical reason for this upthrust?

- **A** The density of the body differs from that of the liquid.
- **B** The density of the liquid increases with depth.
- **C** The pressure in the liquid increases with depth.
- **D** The value of *g* in the liquid increases with depth.
- 11 Forces of 3 N, 4 N and 5 N act at one point on an object. The angles at which the forces act can vary.

What is the value of the **minimum** resultant force of these forces?

- **A** 0
- B between 0 and 2 N
- **C** 2N
- **D** between 2 N and 4 N
