26 Two waves of the same type overlap.

When does the principle of superposition apply?

- A always
- **B** only when the waves have the same amplitude
- **C** only when the waves have the same frequency
- **D** only when the waves travel in opposite directions
- **27** A stationary sound wave is formed in a tube of length *L* that is closed at one end.

The diagram shows the positions of the nodes and antinodes of the stationary wave.

Which graph shows the variation of the amplitude a of the wave with distance x measured from the closed end of the tube?
